Disclaimer

This manual is provided to assist the student while in the Cochise College Nursing Program. The Nursing Administration and Faculty reserves the right to amend or add policies/procedures at any time during the program year.

Accessibility Statement

Cochise College values inclusive learning environments and strives to make all aspects of the College accessible to our students. If you have a disability and believe you need an accommodation to improve access to learning and campus services, you may begin the Welcome Process by reviewing the Student Accessibility Guide at:
www.cochise.edu/accessibility.

As per the Arizona State Board of Nursing requirements, testing accommodations for any Nursing (NUR) Course are consistent with NCLEX accommodations and do not include having notes during testing.

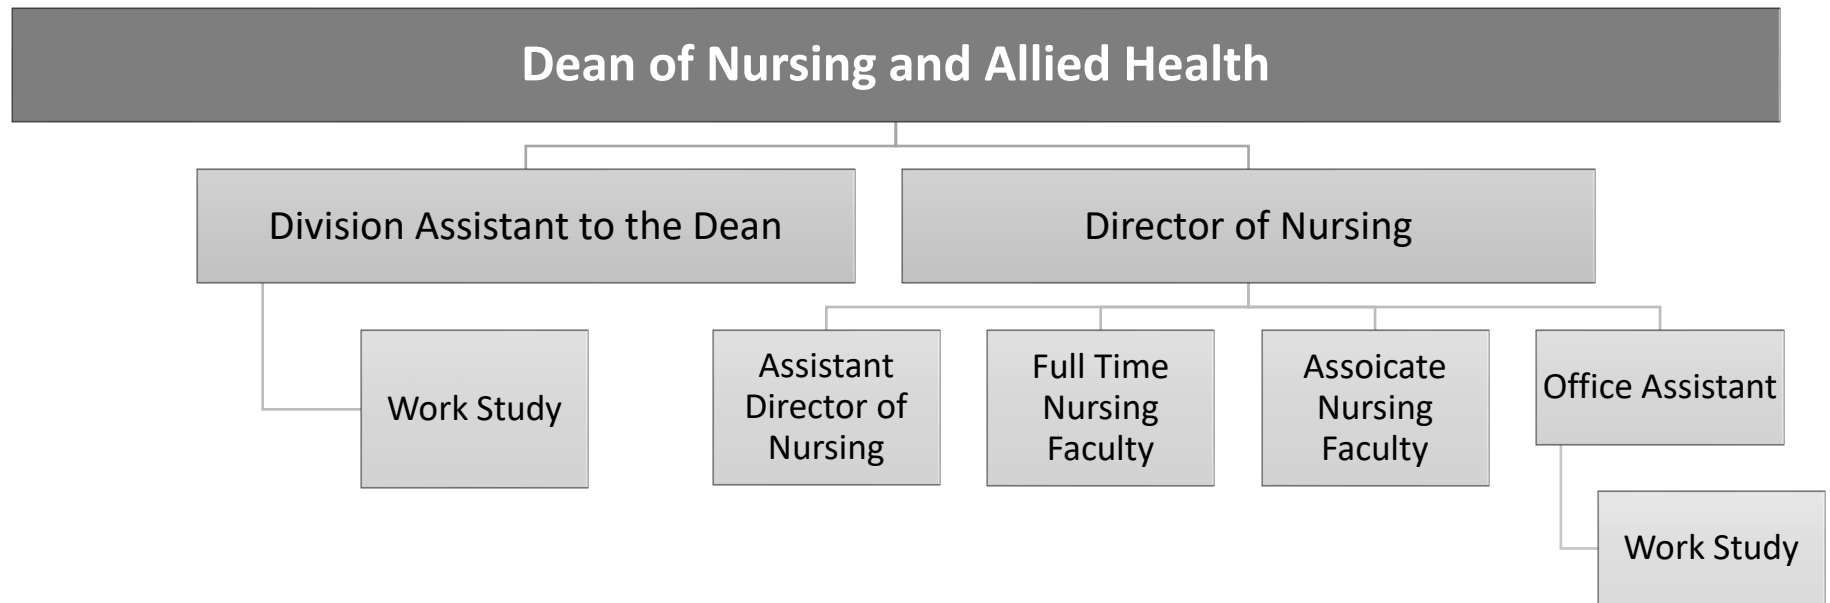

Accreditation

The Cochise College Registered Nurse Certificate Program is Accredited by:

Arizona State Board of Nursing
1740 W Adams Street, Suite 2000
Phoenix, AZ 85007
Phone: (602) 771-7800
Email: arizona@azbn.gov
<http://www.azbn.gov>

Accreditation Commission for Education in Nursing (ACEN)
3390 Peachtree Rd NE Suite 1400
Atlanta, GA 30326

Cochise College Educational Philosophy

MISSION

Cochise College provides inclusive and accessible educational opportunities that support social responsibility, community engagement, meaningful careers, and lifelong learning.

VISION

Cochise College is a leading and responsive college which transforms and empowers our community by fostering collaborative relationships and providing innovative educational pathways.

HOW

(Our beliefs, convictions, behaviors, and actions)

In all we do, we exhibit collaboration, encouragement, respect, innovation, and service. Collaboration: We actively connect with our students and community by providing accessible learning opportunities and resources to overcome barriers, build relationships, and cultivate economic, social, and cultural growth.

Encouragement: We provide personal support to students and staff, faculty, and community members through active engagement and compassion.

Respect: We are a community of acceptance which engages our diverse population (diversity), provides resources appropriate to the needs of individuals (equity), and extends opportunity to all (inclusion).

Innovation: We create new learning experiences to respond and adapt to the needs of our community.

Service: We engage our community through service-learning projects, volunteerism, and civic participation.

RN Program Educational Philosophy

The Cochise College Registered Nursing Program is committed to offering a quality education which provides educational resources to promote meaningful nursing careers, constructive citizenship, and lifelong learning to meet the healthcare needs of a diverse population.

The vision of the Cochise College Registered Nursing Program is to be a learning

community that places its highest priority, resources, and energy on student learning. This is done by creating an environment and experiences in clinical, simulation, virtually, and in the classrooms encouraging students to become active members of this learning community. The program makes learning possible in the classroom as well as through other modalities, activities and experiences that enhance learning. This is done for students as well as faculty and other members of the college community so that a feeling of collegiality abounds. Moreover, this vision empowers students, faculty and staff to create a personally meaningful learning environment where each person accepts responsibility for contributing.

The philosophy of the Cochise College Registered Nursing Program is to create a learning environment in which the student transforms from a beginning student to an entry-level registered nurse generalist caring for a diverse population of patients across the lifespan. The nursing faculty respects the students as adult learners who demonstrate integrity in the classroom, as well as in the clinical setting. The philosophy utilizes a conceptual framework based on the nursing process and related disciplines as a solid foundation for the registered nurse generalist. The registered nurse generalist collaborates with other members of the health care team to provide for patients anywhere along the health/illness continuum.

Core Values of the RN Program

Quality: Commit to a quest for excellence and strive to achieve our highest potential

Lifelong Learning: An attitudinal approach to learning in which the person is open to new ideas, decisions, skills, and behaviors based on scientific evidence and research to promote scientific and technological progress improving patient outcomes.

Diversity: Respecting differences between and among members of the community by embracing and encouraging the expression of ideas, opinions, and thoughts exchanged freely, respectfully, and civilly.

Integrity: Decisions and interactions based on honesty, trust, respect, responsibility, accountability, and ethical behavior.

Adult Learning: An independent, self-directed, problem centered approach utilizing prior experience to gain knowledge.

Student Learning Outcomes

Leaves: Measured Student learning Outcomes (SLOs)

Ground: Guidelines for Professional Standards

Roots: Additional, non-tracked SLOs incorporated throughout the program

Nursing Program Outcomes

The nursing program provides students with the knowledge and skills necessary to administer nursing care to patients in a variety of settings. Courses include content related to the nurse's role as a provider of nursing care, as a manager of care, a member of the discipline of nursing, and as a member of the interdisciplinary team. As the nursing student progresses through the curriculum, each semester builds upon the previous semester in regards to complexity. This is evidenced by the end of semester ATI standardized tests, increasingly complex written assignments, more complex skills lab evaluations and increased critical thinking in both Simulation and Clinical evaluations.

The Cochise College Nursing graduate will deliver safe, competent and quality patient centered nursing care within the role of the Associate Degree Nurse as a:

1. **Provider of Care:** Integrate biopsychosocial and scientific principles when providing technically competent care to groups of individuals within a variety of healthcare settings. The provider of care utilizes the following elements:
 - Nursing Process (M = Measured)
 - Quality Care and Safety (M)
 - Caring
 - Wellness Continuum
 - Lifespan Diversity
2. **Manager of Care:** Collaborate as a member of the healthcare team to manage the care of groups of individuals and families in a variety of healthcare settings. Appropriately delegate activities to manage the care of groups of individuals and families in a variety of healthcare settings. The manager of care utilizes the following:
 - Critical Thinking (M)
 - Evidence Based Practice (M)
 - Communication and Collaboration/Teamwork
 - Informatics
3. **Member of the Discipline of Nursing:** Acculturate professional values and behaviors as ADN graduates through the following:
 - Legal-Ethical (M)
 - Accountability
 - Life-Long Learning
 - Roles and Responsibilities

The Cochise College Nursing Program outcomes are evidenced by:

- Licensure pass rates
- Job placement

- Program Completion rates
- Employer Satisfaction
- Graduate program satisfaction

Nursing Program Structure

- The RN option for the Cochise College Nursing Program is comprised of seven core nursing classes in four semesters.
- NUR 121-A (Medication Math One) and NUR 122 (Nursing One) are both in semester one.
- NUR 122 is comprised of Fundamentals of Nursing related to the well adult client.
- NUR 123 (Nursing Two A) is comprised of Common/Chronic Conditions in the Adult client. NUR 124 (Nursing Two B) is comprised of the childbearing family, obstetrics and pediatrics. These two courses are completed in semester two.
- Completion of the first four (4) nursing courses (NUR 122, NUR 121-A, NUR 123 and NUR 124) and the required pre- and co-requisite general education courses are required to achieve eligibility to take the NCLEX-PN.
- NUR 121-B (Medication Math Two) and NUR 232 (Nursing Three) are offered in semester three.
- NUR 232 content is related to psychiatric and acute conditions in the adult client as well as Preceptorship experience.
- NUR 233 (Nursing four) is offered in semester four. Complex and critical conditions in the adult client, as well as Preceptorship experience.
- Completion of all seven (7) nursing classes and the required pre- and co-requisite general education courses are required to achieve eligibility to take the NCLEX-RN.
- For LPN to RN Advanced Placement Students, a current Arizona LPN license in good standing and written proof of at least one-year work experience as an LPN are required and will grant credit for NUR 122, NUR 123 and NUR 124. LPN to RN Advanced Placement Students are required to take NUR 130 (Transition to Professional Nurse), NUR 121-A (Medication Math I), NUR 121-B (Medication Math Two), NUR 232 (Nursing Three), NUR 233 (Nursing Four), and the required pre- and co-requisite general education courses to achieve eligibility to take the NCLEX-RN.

Student may audit NUR courses once accepted into the program but will count as one of the attempts in the program. Student must notify faculty prior to changing status to an audit throughout the semester.

Student will only have 2 attempts in the nursing program.

Degree Map

First Semester: Fall

Requirement Category	Course(s)	Delivery*	Credits
Gen Ed-Laboratory Sciences	BIO 201 Human Anatomy and Physiology I	F2F	4
Gen Ed-Composition	ENG 101 Composition or ENG 101L Composition with Support Lab	F2F, OL	3
Gen Ed-Liberal Arts	PSY 101 Introduction to Psychology	F2F, OL	3
Gen Ed-Mathematics	MAT 142 College Mathematics or MAT 142L College Mathematics with Support Lab	F2F, OL	3

Second Semester: Spring

Requirement Category	Course(s)	Delivery*	Credits
Gen Ed-Laboratory Sciences	BIO 202 Human Anatomy and Physiology II	F2F	4
Gen Ed-Liberal Arts	PSY 240 Developmental Psychology	F2F, OL	3
Gen Ed-Technology Literacy	NUR 203 Update on Pharmacology (Substitute for TECHLIT)	F2F, OL	3
Gen Ed-Laboratory Sciences	BIO 205 Microbiology	F2F, OL	4

Third Semester: Fall

Requirement Category	Course(s)	Delivery*	Credits
Core Curriculum	NUR 122 Nursing I	F2F	12
Core Curriculum	NUR 121A Medication Math I	F2F	2

Fourth Semester: Spring

Requirement Category	Course(s)	Delivery*	Credits
Core Curriculum	NUR 123 Nursing II-A	F2F	6
Core Curriculum	NUR 124 Nursing II-B	F2F	6

LPN to RN Adv Pathway Only Summer

Requirement Category	Course(s)	Delivery*	Credits
Core Curriculum	NUR 130 LPN to Professional Nurse I (For LPN to RN Advanced Placement Pathway students only)	F2F	4
Core Curriculum	NUR 121A Medication Math I	F2F	2

Fifth Semester: Fall

Requirement Category	Course(s)	Delivery*	Credits
Core Curriculum	NUR 232 Nursing III	F2F	12
Core Curriculum	NUR 121B Medication Math II	F2F	2

Sixth Semester: Spring

Requirement Category	Course(s)	Delivery*	Credits
Core Curriculum	NUR 233 Nursing IV	F2F	12

Total Credits Required: 79-83

*Key: F2F = Face-to-Face OL = Online Reviewed: 3/1/2023

Notes: Summer Session: LPN to RN Advanced Placement Pathway student ONLY: NUR 130 LPN to Professional Nurse I (4); NUR 121A Medication Math I (2). These students do not take NUR 122, NUR 123, and NUR 124. They are required to have an Arizona License in Practical Nursing (LPN) and proof of one year work experience as an LPN.

Career Ladder Concept

The Cochise College Nursing Program RN option is designed on the Career Ladder Concept to permit students several points of exit and reentry. Recognizing that many students pause in their education for financial or family reasons, the current program was developed so those students could achieve different levels of competency throughout the Program. This permits the student to obtain employment in the health field while working in stages toward the final goal of Registered Nurse.

At the end of the first year, students are eligible to take the National Counsel Licensing Exam for Licensure as a Practical Nurse (NCLEX-PN). At the end of the second year, students are eligible to take the National Council Licensing Exam for Registered Nurse (NCLEX-RN).

While this concept has worked to the benefit of many students over the years, it does cause some confusion on the part of potential students. Students misinterpret the Career Ladder Concept to mean that the first year is an LPN program. **This is not the case.** This Nursing Program option is an RN option and the entire curriculum is focused toward this goal.

NUR 120 Transition to Practical Nurse

For first-year re-entering nursing students who have been out of nursing studies at Cochise College for less than one year. Provides an update of the philosophy, policies, and procedures of the Cochise College nursing program. Emphasis is on the nursing process, patient care planning, therapeutic use of self, clinical expectations and basic nursing skills.

NUR 220 Transition: Practical Nurse to Registered Nurse

For second year re-entering nursing students who have been out of nursing studies at Cochise College for less than one year. Provides a review and an update of the philosophy, policies, and procedures of the Cochise College nursing program. Emphasis is on the nursing process, patient care planning, therapeutic use of self, clinical expectations, and more advanced nursing skills.

Course Outcomes

Outcome	NUR 122	NUR 123	NUR 124	NUR 232	NUR 233
Provider of Care					
Caring	Identify attributes of caring for a client-centered environment	Display attributes of caring in a client-centered environment	Display attributes of caring in a client-centered environment related to members of the childbearing family, and to pediatric and adolescent clients	Distinguish appropriate caring behavior for a client-centered environment	Integrate attributes of caring for a client-centered environment
Nursing Process	Write a nursing care plan for a client with specific health need/problem(s)	Differentiate a plan of care for clients / families based on priority nursing diagnoses	Differentiate a plan of care for families based on priority nursing diagnoses	Distinguish appropriate caring behavior for a client-centered environment	Integrate attributes of caring for a client-centered environment
Safety & Quality Care	Implement the principles of safe medication administration	Demonstrate safe medication administration considering the effect on the individual throughout the lifespan	Demonstrate safe medication administration considering the effect on members of the childbearing family, and on pediatric and adolescent clients	Manage safe & effective practice related to pharmacology, medication and treatment regimens	Evaluate medication administration systems and processes collaboratively with the health care team.
	Describe factors that influence a culture of safety	Demonstrate the ability to provide safe and effective care to all clients	Demonstrate the ability to provide safe and effective care to members of the childbearing family, and to pediatric and adolescent clients	Use national patient safety resources for own professional development with a focus on safety in care	Critiques and modifies own nursing practice with a focus on safety
Wellness Continuum & Life Span Diversity	Identify potential resources for clients across the adult life span	Analyze internal and external resources based on client needs	Analyze internal and external resources based on the needs of the childbearing family, and of pediatric and adolescent clients	Implement referrals in collaboration with health care team based on client needs	Implement referrals and access resources in collaboration with health care team based on client needs
	Identify concepts of health and wellness across the adult lifespan	Apply health and illness concepts to client care	Apply health and illness concepts based on the needs of the childbearing family, and of pediatric and adolescent clients	Integrate population, family, individual and national goals to promote health	Integrate population, family, individual and national goals to promote health
	Identify life span variables that impact the health of clients	Apply concepts related to life span variables with nursing practice	Apply concepts related to life span variables	Integrate life span considerations into nursing for individuals, families and populations	Integrate complex nursing care across the life span of individuals, families and populations
	Describe the interaction of human diversity with health, illness, and caring behaviors and attitudes.	Provide patient centered care with sensitivity and respect for human diversity	Provide patient-centered care with sensitivity and respect for human diversity related to members of the childbearing family, and to pediatric and adolescent clients	Integrate respect for human diversity into nursing practice	Integrates understanding of multiple dimensions of patient centered care

Outcome	NUR 122	NUR 123	NUR 124	NUR 232	NUR 233
Manager of Care					
Communication Collaboration, Teamwork & Informatics	Identify factors involved in communication and collaboration, teamwork and informatics for effective management of care.	Participate in communication and collaboration, teamwork and using informatics when delivering quality care.	Participate in communication and collaboration, teamwork and using informatics, when delivering quality care	Evaluate own communication, collaboration and team work within the health care team and environment, utilizing informatics.	Adapt own communication and collaboration, teamwork to the needs of the health care team and system(s). and utilizing informatics.
Evidence-Based Practice	Describe the components of evidence-based practice as it relates to patient care	Differentiate reliable sources for evidence reports and clinical practice guidelines	Differentiate reliable sources for evidence reports and clinical practice guidelines related to members of the childbearing family, and to pediatric and adolescent clients	Analyze evidence-based reports to substantiate nursing interventions in collaborative client care	Synthesize evidence-based practice and the nursing process to provide quality care for a group of patients under the supervision of an experienced registered nurse
Critical Thinking	Identify components of critical thinking and clinical reasoning at the novice level	Demonstrate critical thinking abilities and sound clinical reasoning.	Demonstrate critical thinking abilities and sound clinical reasoning	Appraise own critical thinking abilities and clinical reasoning decisions	Evaluate critical thinking abilities and clinical reasoning of self and other health care professionals
Outcome	NUR 122	NUR 123	NUR 124	NUR 232	NUR 233
Member of the Profession					
Legal-Ethical	Identify competencies for legal, ethical and professional conduct of a nurse	Discuss legal, ethical and professional conduct of a nurse	Discuss legal, ethical and professional conduct of a nurse	Exhibit competencies of legal, ethical and professional conduct of a nurse	Evaluate legal, ethical and professional issues which impact the professional nurse and patient outcomes
Roles & Responsibilities	Explain the roles and responsibilities of the professional nurse	Demonstrate knowledge of the roles and responsibilities of the professional nurse	Demonstrate knowledge of the roles and responsibilities of the professional nurse	Demonstrate accountability for own nursing practice and professional development	Critique personal and professional development of nursing practice(s).
Accountability Life Long Learning	Recognize the importance of accountability for one's own nursing practice and professional growth	Apply accountability to own nursing practice and professional growth	Apply accountability to own nursing practice and professional growth	Differentiate professional behaviors related to the care of patients provided by other team members	Integrate professional accountability and life- long learning into own professional practice.

Arizona State Board of Nursing Qualifications

Professional Registered Nurse

An applicant for a license to practice as a graduate, professional, or registered nurse shall file a verified electronic application with the board and complete the electronic NCLEX Registration accompanied by the prescribed fees and submit proof that the applicant:

1. Has completed satisfactorily the basic professional curriculum in an approved professional nursing program and holds a diploma or degree from that school. This is done by Cochise College electronically after graduation.
2. If convicted of one or more felonies, has received an absolute discharge from the sentences for all felony convictions three or more years before the date of filing an application pursuant to this chapter (Sec.8, Section 32-1632, Arizona Revised Statutes).

Practical Nurse

An applicant for a license to practice as and assume the title of a licensed practical nurse shall file a verified electronic application with the board and complete the electronic NCLEX Registration accompanied by the prescribed fees and submit proof that the applicant:

1. Has satisfactorily completed the basic curriculum in an approved practical or professional nursing program and holds a diploma, certificate, or degree from that program. This is done by Cochise College after graduation.
2. If convicted of one or more felonies, has received an absolute discharge from the sentences for all felony convictions three or more years before the date of filing the application (Sec. 15, Section 32-1637, Arizona Revised Statutes).
- 3.

Code of Academic Integrity

Dishonesty of any nature is a serious offense at the College. Dishonesty undermines the bonds of trust between members of the community and the school, and it defrauds those who may eventually depend on your professionalism and integrity. Nursing programs must have high standards of ethics. As a nursing student and nurse, there is an expectation of integrity. The Code of Academic Integrity is congruent with the Cochise College Academic Dishonesty Policy 3010.

- The Nursing student must commit to self and others, including the responsibility to preserve integrity and safety, to maintain competence, and to continue personal and professional growth through life-long learning.

- The Nursing student will incorporate into all professional relationships a commitment to practice with compassion and respect for the dignity, worth, and uniqueness of every individual.
- The Nursing student will maintain privacy rights and confidentiality of all patient information.
- The Nursing student is responsible and accountable for individual nursing practice, and must take accountability for nursing judgment and actions.

Academic Dishonesty

Cochise College requires students to adhere to the highest level of ethical academic conduct and has no tolerance for academic dishonesty. The college may impose serious academic sanctions as a result of academic dishonesty up to and including suspension and expulsion from a specific program or from the college. A statement regarding and defining academic dishonesty shall be part of every course syllabus.

Academic dishonesty consists of many forms of unethical academic conduct, including, but not limited to, cheating, fabrication, plagiarism, facilitating academic dishonesty, collusion, compromising test materials, misrepresentation/fraud, and violation of the scope of practice.

Cheating: intentionally using or attempting to use unauthorized materials, information or study aids, as well as unauthorized devices such as cell phones and other technology. This includes but is not limited to:

- Copying from another student's work.
- Knowingly using, buying, selling, offering, transporting or soliciting any of the contents of a test.
- Taking a test for another student or permitting someone else to take a test for you.
- Bribing or attempting to bribe, or intimidating or attempting to intimidate another person to obtain a passing or better grade on a test, paper, course assignment or for the course itself.
- Intentional misconstruing or misreporting of facts or incidents relating to any event surrounding the course.
- Submitting work to more than one instructor for credit without disclosure and approval.

Fabrication: Intentional and unauthorized falsification or invention of any information or citation in any academic exercise or activity.

Plagiarism: Intentionally or knowingly representing the words or ideas of another as one's own.

Facilitating academic dishonesty: Intentionally or knowingly helping another to commit an act of academic dishonesty.

Collusion: Obtaining from or giving to another student unauthorized assistance on material in any course work.

Compromising test materials: Unauthorized removal of testing materials from any area, writing or copying test questions, or verbally sharing test questions with any other person.

Misrepresentation/fraud: Using false records, false identification papers, any portion of the uniform, unauthorized I.D. cards or methods of I.D. to influence others concerning your status. Accessing official college documents, or services, or departmental records, or materials, or patient information without specific permission via electronic or other means.

Violation of the scope of practice: Performing outside the level of knowledge and skills permitted by the student's current level in the Registered Nursing Program and as defined by the Arizona State Board of Nursing (ex: performing invasive skills outside of the clinical or lab setting).

Student Responsibilities

Each student will be held fully responsible for the content and integrity of the course work submitted. The following rules, may guide you in upholding scholastic integrity. This list is not exhaustive or all-inclusive:

1. A student's examinations, reports, take home tests, and projects must reflect their own work unless it is properly cited or the instructor specifically indicates otherwise.
2. A student may not remove tests from authorized area, copy, or record test questions, or tell other students test questions.
3. A student is responsible for knowing and following all written or verbal instructions given by instructors or other designated college representatives.
4. A student is responsible for reporting any known violations of this code.
5. A student will perform only to the appropriate nursing student scope of practice at all times.
6. A student will not perform in any way that could jeopardize a client/patient.
7. A student will always immediately report an error in patient care to a nursing instructor and the appropriate staff member.
8. A student will not wear any portion of the uniform, to any clinical agency at any time without express permission from their current clinical instructor.

Tests are the property of the college. Dishonesty includes sharing information on a test with another student, photocopying test materials, taking tests out of the classroom, removing tests from files, electronically or paper, and videos from campus, etc. Dishonesty also includes theft of books, videos and laboratory supplies. Each student will be responsible for their own conduct and will be expected to report violations to discourage others from participating in dishonesty.

Refer to the Dismissal Policy for any violation of the Nursing Department Code of Academic Conduct

Standards of Professional Conduct

The faculty of Cochise College believes that standards of professional conduct are an inherent part of professional behavior. Standards of professional conduct have been developed for all students enrolled in the nursing programs. Students are expected to maintain these standards, and are evaluated on their professional conduct each semester. These standards include but are not all inclusive:

- **Accountability**: is answerable for one's action; answers to self, the client, the profession and the institution.
- **Agency's Policies and Procedures**: reads and adheres to the agency policies and procedures.
- **College Code of Conduct**: can be found in the College Catalog. The student is responsible for accessing this information.
- **Confidentiality**: respects the privacy of clients; respects privileged information.
- **Honesty**: practices fairness and straightforwardness of conduct; displays moral excellence and truthfulness.
- **Dependability**: is trustworthy and reliable.
- **Ethical**: adheres to the ANA Code of Ethics for Nurses and the Nursing Program Code of Academic Integrity.
- **Legal**: operates within the standards of care related to the student nurse role.
- **Nurse Practice Act**: statutes and rules of the State Board of Nursing can be found on their website. The student is responsible for accessing and abiding by this information.
- **Professional Appearance**: adheres to established nursing dress code (ex: lab, clinical, and simulation) in all school activities.
- **Professional Boundaries**: maintains the professional relationships that allow for a safe, therapeutic professional relationship between the student, faculty, and the client/patient.
- **Punctuality and Promptness**: is on time for all classes and clinical/lab/simulation experiences; completes all assignments on time.

- **Respect**: treats self and others with regard to consideration and courtesy. No acts of incivility.
- **Responsibility**: executes duties associated with the nurse's particular role to include adheres to the agency policies and procedures.
- **Safety**: prevents or minimizes risks for physical, psychological, or emotional jeopardy, injury, or damage.
- **Social Conduct**: maintains and respects confidentiality of clients, fellow students and faculty when utilizing on-line resources.

Refer to the Dismissal Policy for any violation of the Nursing Department Standards of Professional Conduct.

Codes of Ethics & Nurse Practice Act

The student is responsible for accessing and adhering to the following nursing websites:

1. American Nurses Association (ANA) Nursing Code of Ethics:
 - <https://www.nursingworld.org/practice-policy/nursing-excellence/ethics/code-of-ethics-for-nurses/>
2. International Council of Nurses Code for Nurses
 - https://www.icn.ch/sites/default/files/inline-files/2012_ICN_Codeofethicsfornurses_%20eng.pdf
3. Nurse Practice Act: Statutes and Rules of the Arizona State Board of Nursing
 - <https://www.azbn.gov/education/nurse-practice-act>

General Policies

Nursing Advisor

- Each student will have access to a nursing faculty member who will serve as a nursing advisor.
- The advisor will have 10 office hours per week minimum. Making appointments are encouraged; walk-ins are also allowed. It is the student's responsibility to contact their advisor.
- The advisor will be available to review test, homework, concerns, etc.

Class Representatives

- The Cochise College Registered Nurse Program shall have student representatives. There will be one to two students elected from each nursing class to act as class representative(s). This will allow the students the opportunity to give input into the program. These representatives will be selected by the class. They are expected to be present (virtually or in person) at designated faculty meetings and advisory council meetings. This will allow them the opportunity to give input into the development of academic policies and procedures. Pertinent issues are addressed and documented in the Systematic Evaluation Plan, and in faculty committee minutes.
- Each class will choose representatives by ballot at the beginning of every semester. The class representative(s) serves as liaison between the students and the nursing faculty.
- Class representatives attend faculty meetings and have the responsibility of bringing class problems of a general nature to the faculty for discussion and/or resolution. Each class representative will be provided a copy of the Student Representative Report, utilized to present concerns to the faculty, during faculty meetings. The class representatives are equally responsible for reporting back to the students the results of such discussions as well as any other matters concerning the class or student body as a whole.

Insurance

- Liability
 - All students are covered by the College liability insurance during the time they are enrolled in the Program. This is paid once a year at registration.
- Health
 - Health insurance is not provided by the nursing department or the clinical agencies. In case of injury during classes (in lecture, learning laboratory, or clinical) students are liable for all personal injuries and costs incurred. It is recommended that students have individual health insurance.

Student Travel

- An opportunity to travel to Mexico may be made available to students for volunteer service.
- Students are required to obtain a U. S. Passport or Travel Card in order to participate in Mexico travel at student's expense.
- Students will be required to sign a Cochise College Student Travel Permission/Release Waiver for any travel (refer to *Admission Forms and Contracts*).

ATI/Exam Fees and NCLEX-RN Exam Preparation

- The Cochise College Program charges all Nursing Students a fee per semester for the ATI Exams and an NCLEX-RN test preparation.

- These exams serve to inform a student of their probability of passing the NCLEX and the degree of preparation they must undertake to ensure success on the NCLEX-PN for first year students and the NCLEX-RN for second year students.
- These fees also cover ATI online tutorials, online practice tests, review modules and e-books, tutorials and assessments.

NCLEX-RN Review Course

- An NCLEX-RN review course attendance is MANDATORY as a program requirement (4th semester).
- If a student is unable to attend the NCLEX-RN review course provided at Cochise College on the scheduled dates, the student is responsible for submitting documentation of attendance at a pre-approved NCLEX-RN course.
- If a student chooses to attend an alternate review course, it must be comparative in length and format and pre-approved by the Cochise College Nursing Department.
 - Pre-approval documentation must include:
 - Name of organization providing NCLEX-RN review course.
 - Dates of NCLEX-RN review course.
 - Confirmation of attendance from instructor or alternate review course program.
- The Nursing Program *Affidavit of Graduation* will not be submitted to the Arizona State Board of Nursing (or any other state board of nursing) if a student does not attend a documented NCLEX-RN review course. Students will not be eligible to sit for the NCLEX-RN without approval of the Affidavit of Graduation.

Note: If a student has submitted their application to the Arizona State Board of Nursing and does not complete all program requirements (including the NCLEX-RN review) within 270 days (R4-19-102), that student must re-submit an application with payment to the Arizona State Board of Nursing.

Note: In the Nurse Practice Act Statutes and Rules of the Arizona State Board of Nursing, (R4-19-312), “An applicant for licensure by either examination or endorsement, who is a graduate of a nursing program located in the U.S. or its territories and does not meet the requirements of subsection (B), shall have completed the clinical portion of a pre-licensure nursing program within two years of the date of licensure.”

Attendance Policies

Lecture:

- Definitions:
 - **Attendance:** is defined as being physically present in the class room the entire class period. (e.g. If a student is tardy or leaves early, it means the student is not in attendance.)
 - **Tardiness:** Arriving after the class start time. The instructor may deny a student from entering the classroom once the class has started.
 - The student is required to discuss tardiness or leaving early with the lecturing faculty.
- Consequences of violation of class attendance policy – college policy 3004.12
 - A student may be dropped from a nursing class for non-attendance under College Policy Procedure 3004.12.
 - Due to required federal financial aid reporting, instructors must take attendance and maintain attendance records for three years.
 - Instructors shall establish specific attendance criteria for each class and indicate the consequences to students for not meeting the attendance criteria. For example, an instructor may indicate that if a student misses more days than credit hours for the class, the instructor may drop the student from the class.
 - Online instructors shall establish reasonable attendance criteria to ensure that students participate at least once a week in an academic-related activity for that course.
 - The drop date given to the student should reflect the last date which resulted in the student violating the instructor's attendance drop criteria.
 - Attendance criteria shall be communicated to students in writing during the first week of each semester as a part of the instructor's course procedure sheet. An instructor may drop a student from class for exceeding these stated limits.
 - Students with disabilities who need consideration for attendance must work through the college disabilities services office to establish an accommodation plan.
 - The nursing program requires that a student come to class on time and remain in attendance for the entire class period. A student who has a pattern of tardiness and/or leaving class early may be dropped from the class.
 - In accordance with College Policy 3004.12, the nursing program requires a student who misses more than the credit hours of a nursing course over the course of the semester may be dropped from the class (e: 12 credit hours = 12 days).

- A student who is not in attendance is still responsible for announcements and materials distributed during class time. In addition, a student is responsible for class content and the assigned readings and audiovisual materials, all explanations, topics and discussions brought up in the course of a class. Class graded assignments are given at the discretion of the lecturing faculty.

Clinicals & Simulation:

- Definition:
 - **Clinicals:** are scheduled sessions in health care agencies or other designated locations during which a student functions under the supervision of a nursing instructor for the purpose of obtaining hands-on experience. This includes assigned simulation experiences.
- Clinical attendance is mandatory. Documentation of attendance may be by student sign-in or by faculty observation.
- Missed clinical:
 - If a student is to be absent from a clinical, the student must notify their designated clinical instructor prior to the start of the clinical. Designated clinical instructor notification may be by phone to the instructor at their home or at the clinical site.
 - If the clinical instructor cannot be reached, then either Course Coordinator or Director, must be notified.
 - Notification of absence should be done as early as possible, preferably the night before the clinical day, or the morning before the clinical begins.
 - Notification of absence must be done by the student unless absolutely impossible.
 - The student must notify the Clinical Coordinator (missed clinicals) or the Lab Coordinator (missed simulation) within 24 hours of the absence to make up the clinical time.
- Simulation experience is part of clinical and all clinical attendance policies will apply.
- Simulation experience will be scheduled through the Lab Coordinator.
- Making up missed clinical time
 - There will be a clinical/simulation make-up fee of \$50.00 each time a student misses a scheduled clinical/simulation assignment.
 - The student shall arrange for a make-up day with the Clinical or Lab Coordinator. The Clinical or Lab Coordinator will inform the student of the date, time, location and instructor for the makeup clinical and will give the student a "*Report of Alternate Clinical Experience*" form, available on Moodle and Program Manual.
 - Upon completion of the make-up day, the student shall have the "*Report of Alternate Clinical Experience*" form completed and signed by the make-up clinical instructor.

- The student shall return the completed and signed "*Report of Alternate Clinical Experience*" form to the Clinical Coordinator within one week of the make-up day.
- The student is responsible for timely completion of this procedure if they are to get credit for the make-up day.
- In addition to making up the missed hours, the student may be required to do a written paper or oral presentation as assigned by the clinical instructor, Clinical Coordinator, or Lab Coordinator.
- After two absences in a semester, student will be placed on an academic contract.
- If student calls off for a third absence in a semester, student will be dismissed from the nursing program.
- Consequences of violation of clinical attendance policy
 - A student who is unable to sufficiently make up missed clinical time or written papers or presentations and, thereby, fails to meet the clinical objectives to the satisfaction of the clinical instructor and coordinators, shall receive:
 - "incomplete" if the work was at level on the last day of clinical.
 - "failure" if the work was below level on the last day of clinical.

Lab & Non-Clinical Simulation

- Attendance for the nursing skills lab class, learning lab return demonstrations, and non-clinical simulations are mandatory.
- Tardiness is disruptive to the students and instructor in the lab and is viewed as unprofessional. Students who are tardy may not be permitted to attend their scheduled lab or complete their return demonstration, and will have to make up the class or return that they missed.
- Students who are tardy for simulations (clinical and non-clinical) may not be permitted to attend their scheduled simulation and will have to make up the simulation that they missed.
- A pattern of absenteeism or tardiness is considered unprofessional behavior.
- Making up missed nursing skills and simulation time
 - In the event of a lab class absence and/or inability to attend a scheduled skill return demonstration, or simulation; the student must contact the Lab Coordinator as soon as possible.
 - Failure to contact the Lab Coordinator or attend scheduled lab/simulation activities may result in disciplinary action.
 - Failure to complete return demonstrations in the allotted timeframe may result in disciplinary actions.
 - If a student has an absence from nursing skills or simulation classes, for any reason, the student will be required to complete a make-up assignment to be determined by the Lab Coordinator.
 - In addition to making up the missed hours, the student may be required to do a

written paper or oral presentation as assigned by the Lab Coordinator.

- Consequences of violation of lab and non-clinical simulation attendance policy
 - A student who is unable to sufficiently make up missed nursing skills or non-clinical simulation time or written papers or presentations and, thereby, fails to meet the nursing skills and simulation objectives to the satisfaction of the Lab Coordinators, shall receive:
 - **First offense:** Verbal warning to student that will be documented in the student file.
 - **Second offense:** A written counseling statement that remains in student file, which requires the student to develop a written plan of action to remedy unprofessional behaviors.
 - **Third offense:** Failure of the lab, which results in failure of the Cochise College Registered Nursing Program.

Requirements for Progression Policy

A student may only take one nursing course at a time, with the exception of NUR 121-A and NUR 121-B (Med Math) which are taken during the fall of the first semester and the third semester of the program.

A student may not progress to the next nursing course until all requirements of the current semester/course are satisfied. This includes the nursing courses as well as the general education courses as outlined in the Cochise College Catalog and Student Advisory Contract. All required courses must be completed by the end of the outlined semester in order to progress.

To Progress within the Nursing Program, the following conditions must be met:

- A student meets all requirements of the grading criteria (see Grading Policy):
- A minimum final grade of “C” is required for all general education courses except sciences and math.
- A minimal final grade of “B” (80%) in the classroom component of all the nursing courses including NUR 121-A & B and NUR 203 (Pharmacology)
- A minimal final grade of “B” (80%) in the science and math general education courses including MAT 142, BIO 201, BIO 202, and BIO 205.
- A final grade of “At Level” or “Pass” in each clinical rotation
- A “Pass” grade in the Learning Laboratory components
- During the second semester, NUR 123 and NUR 124 must be passed with a “B” or higher in order to progress to the other component of second semester as these courses are taught consecutively and progression into the second half of the semester cannot occur if the first half was not completed with a “B” (80%) or higher.
- A student has had no violations of the:

- Code of Academic integrity
- Standards of Professional Conduct
- State Board of Nursing Statutes and Rules
- The Nursing Department policies which have resulted in dismissal from the nursing program (see **Dismissal Policy**)
-

Grading policy

Nursing course grades

- Components
 - NUR 122, 123, 124, 232, & 233 are each comprised of three components; didactic, clinical and learning lab. Each component must be passed successfully, in order for the student to pass a nursing course.
 - Grading standards of each of these components are as follows:
 - Didactic
 - The didactic portion of the course is comprised of tests and various forms of written work. The passing grade in didactic is 80%. (See Grade Computation on the following page.)
 - The grading scale for didactic is:
 - A = 90-100 (Pass)
 - B = 80-89.9 (Pass)
 - D = 70-79.9 (Fail)
 - F = Below 69.9 (Fail)
 - The minimum passing final grade for all nursing courses is “B”.
 - The letter grade is derived from the numerical grade that the student has achieved in the course component.
 - "A" and "B" are the passing grades. "D" and "F" are failing grades. There is no "C" in the nursing department’s grading scale.
 - Clinical
 - The clinical component is graded:
 - At Level (Pass)
 - Below Level (Fail)
 - Refer to Clinical Policy for details related to grading.
 - Learning Laboratory
 - The lab component is graded:
 - At Level (Pass)
 - Below Level (Fail)

- First Year students must pass NUR 121-A in order to continue enrollment in NUR 122. Second Semester students must pass NUR 123 or NUR 124 in the first half of second semester to progress to the other course in the second half of the semester. Both NUR 123 and NUR 124 must be passed for the student to progress to the 3rd Semester for NUR 232. Second Year students must pass NUR 121-B in order to continue enrollment in NUR 232.
- Grade Computation
 - Grades will not be rounded up.
 - The student must earn a minimum grade of 80% to pass nursing courses.
 - Example:
 - Grade - 79.9% = D
 - Grade - 80% = B
 - See specific course syllabi for course grade computation breakdown (ie: test %, quiz %, etc).

Withdrawal

"W" GRADE -- DROP

- Student Initiated Withdrawal – All Terms
 - A student may withdraw from a class up to 5 calendar days prior to the start of finals.
 - If a student withdraws a class before the Full Time Student Equivalent (FTSE) date (the 45th class day of the semester), there will be no record of the withdrawal on the student's transcript.
 - Student initiated withdrawal after the FTSE date (45th days) and up to 5 calendar days prior to the start of finals, will result in a "W" on the student's transcript. After this time, the student will receive a letter grade of A, B, D or F from the instructor.
 - It is the student's responsibility to be aware of their grade status at all times.
- Instructor Initiated Withdrawal – All Terms
 - Instructor initiated withdrawals prior to 5 calendar days before the start of finals will result in a "W" on the student's transcript. After this time the student will receive a letter grade of A, B, D, or F.
 - Refunds will be determined according to the college refund schedule.

Note: Student and instructor-initiated withdrawal both count as an attempt to complete a nursing course. Refer to Re-Admission after failing, withdrawal, and dismissal

“W”, “D”, “F” grades – First semester

- A student who withdraws (“W”) or fails (“D” or “F”) from NUR 121A must re-apply for admission following the standard admission policy.
<https://www.cochise.edu/nursing>
- If the student does not successfully complete the semester after two attempts, they are not eligible to re-enter the practical nursing certificate program. If a student attends any part of the course it will be considered an “attempt.”

“W”, “D” or “F” grades - second & third semester

- A student who fails (“D” or “F”) a nursing course may apply to re-take the semester a second time.
- A student who withdraws (“W”) for reasons other than expulsion for academic and/or professional conduct, may apply to re-enter the appropriate semester.
- If the student does not successfully complete the program after two attempts, they are not eligible to re-enter the practical nursing certificate program.

Dismissal Policy

Listed below are examples for student dismissal for the registered nurse certificate program. This list IS NOT exhaustive or all-inclusive.

1. A single incident or accumulation of incidents which are hazardous to patient welfare.
2. A series of problems indicating inappropriate patterns of behavior.
3. Failure to immediately report a patient care error/incident(s) to college nursing instructor and the responsible nursing personnel.
4. Any preparation of written material that is fraudulent and/or untruthful.
5. Any performance and/or condition while in the host agency which brings from the agency serious criticism indicating an inability to perform in a professional manner.
 - EXAMPLE: a student performs a skill that they have not been taught or signed off on.
6. Failure to meet the attendance policy as stated in the nursing program manual.
7. Proven dishonesty.
 - EXAMPLE: stealing or removing supplies from a clinical agency and/or school.
8. Plagiarism of written assignments or quizzes, etc.
9. Lack of adequate theoretical knowledge for applications to patient care.
10. A pattern of excessive fatigue while on duty.
11. Inappropriate use of uniform.
12. Being under the influence of drugs, including alcohol, while on duty and/or in the class.

13. Lack of preparation for clinical practice, e.g., care plan, lab practice.
14. Act(s) of unprofessional conduct.
15. Violation of confidentiality.
16. Pattern of inappropriate communication.
17. Act(s) of academic dishonesty.
18. Failure to respect client rights and dignity.
19. Soliciting, borrowing or removing property or money from a client or client's family.
20. Assuming client care tasks for which the student lacks the education or competence to perform.
21. Removing drugs, supplies, equipment, or medical records from the clinical setting and/or learning laboratories.
22. Performing an invasive procedure outside of a clinical or skills lab setting.

Consequences for Violation

Upon being found guilty of an academic integrity or professional conduct violation, any one or a combination of the following penalties may be imposed:

- Student may receive a formal reprimand.
- Student may be required to take a specific course not in the regular curriculum of the practical nurse certificate program, such as ethics.
- Student may receive a zero for the work involved.
- Student may be removed from clinical rotation. Failure to complete the clinical rotation means failure of the course.
- Student may receive a failing grade of "F" in the course for the semester.
- Student may be dismissed from the practical nurse certificate program and may or may not be eligible to reenter.

Note: A student dismissed because of violations of the: Code of Academic Integrity; Standards of Professional Conduct; State Board of Nursing Rules and Regulations or Scope of Practice; or the Nursing Department Policies, may NOT re-enter the nursing program. (This list is not all inclusive.)

Student Due Process & Academic Appeal

A faculty member who suspects a student has committed an act of academic dishonesty or unprofessional conduct or has compromised client safety will:

- Inform the student as soon as possible of the suspected infraction.

- If the infraction is a client safety issue, the student will be removed from the clinical area immediately and may not return until the appeal procedure is completed. The student may continue to attend classes (didactic, lab, or simulation) until a decision has been reached.
- Provide the student with a written statement of the suspected infraction prior to a meeting with the student.
- Schedule a meeting with the student to discuss the suspected infraction.
- The faculty member has 5 academic days to present the consequences of the suspected infraction. The consequences will be provided to the student in writing within three academic days of the final decision of consequences.
- If the matter cannot be resolved at that level, the student will request an appeal of the decision with the program director within 5 academic days.
- The student shall be notified of the proposed meeting date and time.
- The program director has 5 academic days to consider the appeal. The decisions, based on the second meeting with the program director, will be provided to the student in writing within three academic days after the final meeting.
- If the decision of the meeting with the program director results in the student's dismissal from the nursing program, the student will receive a grade of "F" for the course.
- The decision may be appealed through the College's appeal process as described in the Cochise College Policy 3011.
- Any student who is dismissed from the nursing program for violation of the following will receive an "F" in the course: (This list is not all inclusive.)
 - Academic integrity
 - Professional conduct
 - Nursing department policies
 - A student who does not formally withdraw from a nursing course but who stops coming to class will receive an "F" in the course.

Grade Appeal Policy

Any student who has not obtained a minimum of 80% for any nursing course will follow these steps:

- All grades will be reviewed and verified by the Nursing department within one week of final grade posting.
- Student may review course grades with their nursing advisor within the week of posting.
- Student may review course grades with Director if there is a continued grade dispute.
- Student should follow the Cochise College Academic Appeals Policy, 3011.

Student Complaints & Grievances

Nursing students who have a complaint, grievance or personal issue of concern regarding a grade dispute, an instructor, or other personal issues, are encouraged to initially discuss the issue with the instructor involved. If satisfaction is not attained after discussion, or if the student cannot speak to the instructor, the student is encouraged to progress through the chain of command in the following order to resolve the issue:

1. Course Coordinator
2. Director of Nursing
3. Dean of Nursing and Allied Health
4. Vice President of Student Services

If the student is still dissatisfied with the resolution, please follow the Student Complaints and Grievance process for Cochise College which is located within the Cochise College Student Handbook in accordance with Cochise College Administrative Policy 4008.

If the student is still dissatisfied with the issue, please follow the Student Complaints and Grievance process for Cochise College; which is located within the Cochise College Student Handbook. This process is in accordance with the Cochise College Administrative Policy 4008.

Re-Admission Policy & Procedure

Re-admission policy:

- Students who drop out, withdraw, or fail the Cochise College Nursing Program for any reason may be re-admitted to the nursing program **one time** only.

Re-admission procedure / one-time re-entry policy

- Once all documentation has been received by the deadline, the following occurs:
 - Nursing administration will determine if the applicant is eligible to proceed with the re-admission process verifying completion of all requirements.
 - All students accepted for re-admission will be required to sign a formal educational contract outlining expectations with their assigned advisor.
 - If a student does not meet any portion of the educational contract, the student will be dismissed from the program and ineligible to return.

UPON COMPLETION OF RE-ADMISSION PROCESS

- Successful completion of the re-admission process does not guarantee admission into the nursing program.

- Admission is on a space-available basis and the administration has the discretion to deny re-admission for past performance, which may include: Academic performance, clinical competency, lab performance, and professional conduct.
- Following acceptance, students will receive a Nursing Program History and Physical form for completion.
- A drug/alcohol screening will follow at randomly selected dates and times.
- All Cochise College Nursing students applying for re-admission must do so by March 1st for fall semester and August 1st for Spring semester and must complete a nursing transition course (NUR 120 or NUR 220) prior to re-entry into the Nursing Program.
- Any Cochise College nursing student who has been out of nursing studies for more than one year must take the last nursing course they completed successfully, as a refresher.

REPEATING PREVIOUSLY PASSED NURSING COURSE POLICY

- Students admitted into the nursing program and who fail to pass one of the nursing courses may repeat the last lower-level class passed in the program. This is also in agreement with college policy. However, to ensure the student is successful when repeating the failed class, the student must adhere to the following steps when repeating the lower-level class:
 - Student must attend all lectures unless the student has an acceptable excuse to miss a class (e.g., military orders, hospitalization with proof, court order, jury duty).
 - Student must attend all scheduled skills labs and demonstrate proficiency and safety in all skills.
 - Students must attend all clinical experiences and demonstrate competency and safety.
 - Student will sign an academic contract stipulating the above points.
 - Failure to comply with the above stipulations will result in the student being dropped from the class and following the current re-admission policy.
 - This option is available to those students failing a nursing course during the 2nd, 3rd and 4th semesters.

Course specific Re-Admission Criteria

A student may be re-admitted to the nursing program one time only, and admitted only if space is available. To be considered for admission, the following steps must be taken for each course:

- NUR 122
 - Must re-apply as a first-time applicant.
 - There is no guarantee of acceptance as the applicant's application will be included with all other first-time candidates.

- Application Deadline: April 30th
- NUR 123
 - Submit the following documentation:
 - Cochise College Nursing Application
 - Waiver of Licensure
 - Valid Fingerprint Clearance Card
 - Official Transcripts (all colleges attended except Cochise College) for curriculum alignment
 - Application Deadline: August 10th
- NUR 124
 - Submit the following documentation:
 - Cochise College Nursing Application
 - Waiver of Licensure
 - Valid Fingerprint Clearance Card
 - Valid, active unencumbered Arizona LPN license
 - Official Transcripts (all colleges attended except Cochise College) for curriculum alignment
 - Application Deadline: August 10th
- NUR 232
 - Submit the following documentation:
 - Cochise College Nursing Application
 - Waiver of Licensure
 - Valid Fingerprint Clearance Card
 - Official Transcripts (all colleges attended except Cochise College) for curriculum alignment
 - **Application Deadline: March 1st**
- NUR 233
 - Submit the following documentation:
 - Cochise College Nursing Application
 - Waiver of Licensure
 - Valid Fingerprint Clearance Card
 - Official Transcripts (all colleges attended except Cochise College) for curriculum alignment
 - **Application Deadline: August 10th**

Examination Policy

Tests and testing computers are the property of the Cochise College Department of Nursing and cannot be removed from areas designated for the taking and reviewing of computerized tests.

Failure to Take A Test at The Assigned Time:

- A test may be taken at a time other than the assigned time only in the case of illness or an extreme emergency.
- If a student cannot take a test at the assigned time, they must contact the course coordinator, the program director, the assistant director, or the administrative assistant, before the scheduled test time.
- If the student properly notifies the appropriate individual (see above), there will be a reduction of 10 points off of the make-up test grade.
- The student is responsible for making arrangements with the nursing faculty to make up the test which must be taken as near the scheduled date as possible and no later than 4 academic days later.
- The student *MUST* take the make-up test within four (4) academic days from when the test was given except in the case of illness or an extreme emergency. This is required so that the student's grade will be in parity with the rest of the student's grades, and to demonstrate that the student studied the material.
- The make-up test may be either the original test or another test, at the option of the course coordinator.
- Taking a test at a time other than the scheduled time more than once will result in faculty review of the student's status.
- Exceptions:
 - Court mandated – must show proof.
 - Hospitalization – must provide evidence, program director discretion.

Penalties for not adhering to examination policies

- Students who do not take the test at the assigned time, but give proper notification will be receive a 10-point deduction on their test
- Students who do not take the test at the assigned time and do not give proper notification will be receive a 20-point deduction on their test
- Students will receive a grade of zero (0) for their test if it is the second non-notification offense.
- Removal of a test or testing computer from a designated area may result in dismissal from the nursing program.
- Copying or recording test questions or answers in any way will result in dismissal from the nursing program.

Test Taking Policy

Unit Exams:

- Students should arrive to class or at home prepared to test.
- No talking
- No backpacks
- No books on table or testing area
- No recorders
- No cell phones allowed in the testing area
 - MUST be turned off or in another room if testing at home
- No pagers
- No watches
- No brimmed caps
- No sunglasses
- No calculators (one will be provided to you within the exam testing platform)
- No food or drinks
- Items permitted by the program for testing in person or virtually include the following:
 - Blank scratch paper (if needed)
 - Pencils

Proctored Exams:

- Know your ATI username and password before showing up for a proctored exam
- Student will bring ID which contains a current photograph and must be verified as a positive match with the proctor.
- If the photo ID does not match, the examinee will not be allowed to complete the proctored exam.
- Personal belongings and electronic devices of any kind are not allowed in the testing area and should be left in student cars.
 - This includes but is not limited to, coats, jackets, hats, sunglasses, backpacks, phones, smartwatches, and personal calculators with discretionary allowances for religious apparel.
- Food and drink, unless predetermined as medically necessary, are not allowed in the testing area.
- No communication is permitted among students taking the assessment. Students are expected to work independently.
- A student may be granted permission to use the restroom during the exam. However, time missed during the break cannot be made up and the student must be escorted to the restroom by a proctor and monitored for suspicious behavior.
- Once the student has completed the exam and they have checked out with the proctor they are to leave the testing area so as to not disturb those still taking the exam.

Reviewing exams:

- Unit Exams
 - Students will need to set up an appointment with their academic advisor to complete their test review in person or on zoom.
 - The test review must be completed within 2 weeks of the test grades being posted.
 - Students who wish to “challenge” a test item will need to do so during the instructor’s office hours and complete the “Test Item Challenge Form” in the presence of the instructor.
 - The student will have full access to their course test books, if needed
 - The “Test Item Challenge Form” will remain in the nursing department and the student is unable to take notes or write any portion of the question or answer down unless completing the form.
- Proctored Exams
 - Students will view their test scores immediately following the completion of the computerized test.
 - Review of the questions or question content will not be completed due to the nature of the exam.

ATI Testing Policy

Summative ATI exams are given during or at the end of each nursing course. Research has indicated that the ATI assessments and associated remediations are a strong predictor of student success for passing the NCLEX exam. Students are required to complete the assigned ATI assessments for each course. At the end of the program students will be required to take the RN Comprehensive Predictor assessment. The ATI testing and remediation process is outlined in the below rubrics. The percentage of each ATI assessment will be determined and outline in each course syllabi.

ATI _____ Grading Rubric

You can earn 10 points total. This assignment equals ___% of your total grade

PRACTICE ASSESSMENT & REMEDIATION	
1 point	2 points
Complete Practice Assessment	Complete Remediation <ul style="list-style-type: none">• Minimum 1 hour of Focused Review• Active learning template for EVERY topic missed• Take Post study quiz

PROCTORED ASSESSMENT & REMEDIATION			
Level 3 = 4 points	Level 2 = 3 points	Level 1 = 1 point	Below Level 1 = 0 points
Remediation – 3 points: <ul style="list-style-type: none">• Minimum 1-hour of Focused Review• Active learning template for every topic missed	Remediation – 3 points: <ul style="list-style-type: none">• Minimum 2-hour of Focused Review• Active learning template for every topic missed	Remediation – 3 points: <ul style="list-style-type: none">• Minimum 3-hour of Focused Review• Active learning template for every topic missed	Remediation – 3 points: <ul style="list-style-type: none">• Minimum 4-hour of Focused Review• Active learning template for every topic missed
10/10 points	9/10 points	7/10 points	6/10 points
Proctored Assessment Retake			
No retake required	No retake required	¹ Retake required	¹ Retake required

¹Students who are required to retake proctored exam may earn 1 additional point if Level 2 or 3 is reached on retake

Dosage & Calculation Test Policy

- Each student will take the dosage and calculation quiz as assigned (see lecture/testing schedule for dates). Competency must be demonstrated for medication dosage and calculation. Competency is demonstrated by completing the dosage and calculation skill with 100% on the assessment.
- It is mandatory for a student to attend the assigned testing date and time to take the dosage and calculation quiz.
- If the student does not demonstrate competency on the medication math quiz scoring a 100%, the student must participate in remedial work until competency is achieved.
- Mandatory remedial work will be completed with assignments due to the assigned faculty as requested.
- After completion of remedial work, the student will take the dosage and calculation quiz retest on a day and time determined by the assigned faculty.
- Student must pass the second test with a 100% to demonstrate competency.
- If the student does not pass the second competency with 100%, the student must participate in additional formal remediation assigned by faculty.
- If the student does not obtain 100%, after the third attempt, the student will fail the learning lab because the student has not fulfilled a critical requirement of the course. Failure of the learning lab means failure of the nursing course.
- Students who fail the competencies, must pass medications in clinicals only under direct supervision of their clinical instructor until they pass the re-test with 100%.

Quizzes & Miscellaneous Assignments

- Unannounced quizzes may be given in class.
- In-class quizzes cannot be made up, except by faculty discretion.
- Take-home quizzes must reflect the student's own work unless otherwise instructed.
- For example: the instructor may require that the quiz be a small group project.
- Grade percentage for quizzes is listed in the individual syllabi for each nursing course.
- Papers submitted without a name will not be accepted and will result in a grade of zero.
- Deadlines for turning in quizzes are determined by individual instructors.
- All quizzes will be entered in the grade book; the lowest score will not be dropped before final grade calculation.

Clinical Rotation Policy

Agencies

- A student is responsible for knowing and abiding by the philosophy/mission and standards of care of the health agency where they are assigned.
- Orientation to each agency will be conducted for clinical participation.

Assignments

- Any possible legal impediment to licensure must be made known to the Cochise College Nursing Administration prior to assignment to a clinical agency.
- Clinical assignment days/times may include morning, evening, or all day, including weekends.
 - There will be no consideration for students outside work schedule.
 - Students should speak to clinical instructor to make sure there are no conflicts.
- Clinical policies will be reviewed by the clinical instructor prior to clinical rotation.
- A student is expected to come to the agency prepared (as required by the clinical instructor) to care for their client(s). A student who is not prepared will be sent home, or given an alternative assignment.

Change of Clinical Day, Instructor, or Site

- Any change of clinical day, clinical instructor, or clinical site (mental health, PEDs or OB) must be reassigned by the Clinical Coordinator or Director of Nursing.

Health

- A student who attends clinical with any health problem or behavioral problem which negatively influences their performance and/or the health of others will be sent home.

This will be documented in the student's clinical evaluation. If a student misses a clinical because of illness, the clinical instructor may require an Arizona licensed healthcare provider (MD, DO, NP, PA) release before the student returns to clinical.

- If the student has a health condition which may interfere with their performance in the clinical area, continuance in the nursing program will depend on the written recommendation of the attending Arizona licensed healthcare provider (MD, DO, NP, PA) and the policies of the nursing department.
- The clinical instructor reserves the right to remove a student from the clinical area if they suspect the student of any condition that could impair student and/or patient safety. See complete details in "*The Impaired Student Policy*".

Required Immunizations

- Students in the Cochise College Registered Nurse Program participate in clinical experiences at a wide variety of agencies throughout Cochise and Santa Cruz Counties in the course of their education. Students are required to have certain immunizations. Students should understand there are specific health risks involved in the pursuit of any of the health career programs (see *Statement of Understanding*).
- To reduce these health risks, the Cochise College Nursing Department requires all students to obtain various immunizations prior to the start of any clinical experience.
 - A student who does not have immunizations completed and turned into the nursing office by the deadline will be unable to attend.
 - Inability to attend clinical/SIM for any reason will result in the need to make up the clinical/SIM.
- For any student that may have personal, physical, or religious beliefs that would prevent them from obtaining the required immunizations must sign a waiver stating the reason for refusal of immunization. Students understand that clinical facilities may require specific immunizations. If the student is non-compliant with requirements they may not be allowed in that facility, and may not be able to complete clinical requirements for the practical nurse certificate program.
- Reasonable accommodations may be made. The student is responsible for completing all requirements of the Registered Nurse Program in order to maintain enrollment.

Medical Restrictions

- Any student who complains of back, knee, or other disability when doing clinical skills must be referred to the program coordinator, and if needed to the Office of Accessibility Services.
- Pregnant students are encouraged to notify their program coordinator they become pregnant.
- Students must provide documentation of any restrictions by their healthcare provider regardless of whether they choose to report their pregnancy to the nursing program.

- A pregnancy release form can be provided by the nursing program.
- All information will be kept private and confidential.

Prescription or Over-The-Counter Medication

- Students should avoid medications taken within 6 hours if it may impede with providing patient safe care. must notify their clinical instructor of any medication taken within four (4) hours of a clinical experience.
- The instructor will assess the behavior of the student. The instructor may excuse the student from clinical based upon professional discretion.

Impairment

- If a student is suspected by the clinical instructor of any condition and/or substance use that could impair or interfere with student or client safety they will be removed immediately from the client care areas, lecture, and lab areas. The program coordinator and the program director will be notified.
- Impairment is defined as the inability to function safely and effectively. Students who have not had adequate rest are not able to function in a safe, effective manner in the clinical setting. Students of the Cochise College Registered Nurse Program must have at least eight hours of time off between working and reporting to their clinical assignments. Any student not complying with this policy will be removed from the clinical setting and will be required to make up the hours. (Refer to Clinical/SIM make up Policy, fee).

Suspected substance abuse

- During the clinical experience, if the clinical instructor, using their own professional discretion, suspects' substance abuse by a student, the instructor shall remove the suspected student immediately from the care of clients. (Refer to Cochise College Administrative Policy 5003 and Cochise College District Board Policy 614).

Clinical procedures and treatments

- A student must notify the clinical instructor prior to performing any procedure or treatment in the clinical area, unless other arrangements have been made with the clinical instructor.
- A student is supervised by the instructor while giving medications until the instructor judges their performance is safe.
- I.V. "push" medications may not be administered by practical nursing students. Giving IV "push" medications is grounds dismissal from the nursing program. (Normal Saline flush is NOT considered medication for this purpose).
- NO VERBAL ORDERS will be taken by or carried out by students.

- Clinical agency incident reports involving a student and/or client are to be completed in full and signed by the student and clinical instructor. The clinical instructor will notify the Clinical Coordinator of the incident both verbally and in writing. The Clinical Coordinator will notify the Program Director. (All documentation of the incident will be given to and kept by the director.)
- In the course of learning nursing skills students may practice non-invasive skills on each other. No invasive skills may be practiced by any student or instructor outside o clinical or lab/simulation. If a student objects to practice sessions involving other students, she/he may discuss the situation with the Learning Lab Coordinator.

Incidents

- During the clinical experiences, a student may come into direct contact with a patient's body fluids. Direct contact with body fluids can expose the student to communicable disease(s). As a preventative measure, follow policies regarding the wearing of personal protective clothing (gloves, gowns or eyewear), and follow the agency's policy on needle disposal.
- In the event of an exposure incident, the student needs to immediately wash the exposed area according to agency policy, and notify the instructor. The instructor is responsible for knowing the correct procedure for the clinical institution.
- An incident report or report of unusual occurrence will be completed; the agency's infection control nurse will be contacted and the assistant director and director will be notified.
- In some instances, a series of blood tests are needed to monitor the exposed student's health status. In other cases, medical treatment must be initiated in a timely manner.
 - The student is responsible for obtaining these tests and paying for them.
 - For this reason, it is advisable that a student have their own health insurance, since health insurance is not provided by the College.
- Other incidents such as student injury or needle stick, patient fall, medication errors, or suspected abuse must be reported to the supervising instructor immediately. This list is not all inclusive.

Skills improvement

- If the clinical instructor identifies that the student needs to improve their abilities to perform a skill(s) and/or procedure(s), a student will be given a written referral to the learning lab coordinator.
- The student is responsible for making appointments with the learning lab coordinator within one week of clinical instructor notification and meeting the requirements (e.g. more practice and/or passing another return demonstration) and deadlines specified on the referral (remediation form).

- Students are responsible for returning a completed referral form from lab coordinator or instructor to the clinical instructor.

Transportation

- Each student must provide their own transportation to and from clinical facilities.
- Lack of transportation cannot be used as an excuse for absence, or to influence clinical assignments.
- Students may not provide transportation for clients (patients) in any situation.

Clinical Skills Performance List

(reviewed March 1, 2022)

NOT ALLOWED

Vaginal Check	Central Line Removal/Insertion (With the exception of insertion/removal of huber needle in indwelling port)
Fibrinolytic Clot Remover	Defibrillation/Cardioversion

ALLOWED ONLY WITH DIRECT INSTRUCTOR SUPERVISION

Third/Fourth Semester (NUR 232, 233)

Specimen from Arterial/Central Line	IV Titration Medications
IV Push Medication	Arterial Line Dressing/Management
Blood Transfusion (Cannot verify/observation only, instructor supervision with 1 st 15-minute v/s)	Access Port Central Line
PCA Initiation and Setup (Cannot verify)	Huber needle insertion/removal into indwelling catheter (Port-aCath)

Skills that must be observed by their clinical instructor for first time. With instructor's approval, skills can be performed independently unless DELEGATED to a specific RN

First Semester (NUR 113 or 122)

Communication	Safety & Infection Control	Range of Motion
Documentation	Personal Care/Bathing/AM & PM	Insulin Administration
Medication Administration (excluding parental and IV)	Sterile Technique	Handwashing
History & Physical Assessment	Dressing Change (includes sterile)	Wound Care
Vital Signs	Specimen Collection	Activity/Transfer
NG/G-Tube Medications	NG/G-Tube Feedings	NG Insertion/Removal/Suctioning
Restraints	Report	Enemas
Admission/Discharge	Drains	Ostomy
Oxygen Administration	Urinary Catheterization	Assistive Devices
Isolation	Bed-Making	Finger Stick Blood Glucose

Second Semester (NUR 114, 115 or 123, 124) – In addition to above

Venipuncture	Cardiac Monitoring	Tracheostomy Suctioning
Basic EKG (12 lead) Application	IV Pump	Principles of IV Therapy (includes calculation of flow rate)
Convert IV to Lock	IV Tubing Change	Central Line Sterile Dressing Change
Antepartum Assessment	IV Initiation/Discontinue	Perioperative Care
Postpartum Assessment	Fetal Monitoring	Flushing of Peripheral Lines
Flushing of Central Line Catheters	IVPB Medications (per AZBN LPN advisory board competencies)	Code (per AZBN LPN advisory board competencies)
IV Fluid Change (per AZBN LPN advisory board competencies)		

Third/Fourth Semester (NUR 232, 233) In addition to above

TPN	Chest Tubes	Nasal/Endotracheal Suctioning
Advanced EKG Application	Ventilator Care	Hemodynamic Monitoring

Clinical Evaluation Policy

The clinical evaluation is a tool used by the clinical instructor to evaluate the student's performance in the clinical agencies. The purpose is to assess the student's areas of strength and weakness and to document whether the student meets the standard of safe practice and professional conduct required to pass the clinical rotation. The evaluation tool is used to:

- Assess and evaluate the professional conduct and growth of a student
- Apprise the student of expected clinical standards
- Apprise the student of expected clinical performance
- Measure and document the performance level of a student by both the instructor and the student
- Facilitate the development of goals and objectives by the student and instructor for the student's growth

Grading scale

- At Level = (Pass)
- Below Level = (Fail)

Clinical criteria

- All of the criteria are critical. The student must demonstrate at least "At Level" performance in **all** of the criteria. Students who receive a "Below Level" in any of the criteria listed on the clinical evaluation tool may fail the clinical rotation, depending on the following circumstances:
 - **Failing the Same Criteria More Than Once**
 - Students receiving a "Below Level" in any specific criteria more than once during their enrollment in the nursing program will fail the entire semester of nursing.
 - **Last Rotation of a Semester**
 - Students receiving a "Below Level" in **any** criteria in their **final** rotation of a semester will fail the rotation, and thereby fail the entire semester of the nursing program.
 - **Completion of Assignments**
 - All assignments related to the clinical must be satisfactorily completed.
 -

Student self-evaluation

- Each first-year student will perform a self-evaluation at the mid-point of each 8 week clinical rotation.
- Clinical rotations less than 4 weeks in length are exempt from this ruling because of the limited time frame.

- The rules and details regarding instructor evaluation in the clinical rotations less than 4 weeks in length will be announced by the individual instructors of these rotations. Students are responsible for knowing these rules and details.
- The instructor will review and provide input into this self-evaluation.
- The instructor will meet with the student to review the mid-rotation evaluation.

End of rotation evaluation

- The instructor will also perform an evaluation of the student at the end of each rotation.
- An instructor/student conference is required at the end of the clinical rotation.

Clinical failure ("below level")

- If a student is rated "Below Level" by their clinical instructor in any of the clinical criteria, the student, in collaboration with the clinical instructor, will write out goals and objectives for attaining "At Level" performance in the pertinent area(s). These will be reviewed by the student with the instructor each week to measure the student's progress in achieving these goals.
- The student is responsible for changing his/her behavior to meet the expectations and criteria of the rotation.
- Failure of the student to improve their performance and bring their performance up to "At Level" by the end of the semester results in a failure of the clinical rotation. Failure of the clinical rotation results in the student failing the entire semester of the practical nurse certificate program. Clinical failure means failure of the nursing course.
- The evaluation will be given to the program coordinator.

Uniform Policy

The Cochise College student nurse uniform is intended solely to identify its wearer as a student, sponsored by the nursing department, under the immediate supervision of a nursing instructor, and/or preceptor, in the process of learning the practice of nursing.

The student nurse uniform **MUST** be worn for all clinical and simulation experiences unless otherwise stated.

The student nurse uniform, either as a whole or any of its separate parts (name badge), may not be worn in any health care agency or other setting unless the student is under the supervision of their clinical instructor, or has the direct permission of their clinical instructor.

Students who are working in specialty areas, such as psych, preceptorship, home health, etc., will receive specific instructions regarding the wearing of the student nurse uniform and any of

its separate parts. This instruction will come from the clinical instructor(s). The student is responsible for knowing and following these instructions.

As representatives of the college and of the nursing department, the wearers of this uniform are expected to conform to the rules and standards of the college, the nursing department, and the health care agencies to which they are assigned.

Students who do not conform to the rules and standards of the college, the nursing department and/or the health care agencies, may be dismissed from the registered nurse program.

Students who wear the uniform, or any part thereof, for any purpose or under any conditions other than those specified herein are committing a fraudulent act and may be dismissed from the Registered Nurse Program.

Composition of the uniform

- Professional appearance is expected of the student. Uniforms should be kept clean and neatly pressed.
- Students shall wear the designated embroidered white scrub top with black scrub pant (any style) or black or white scrub skirt. The hem of a skirt must be at the knee or below. Each top must be embroidered with the Cochise College emblem along with the Cochise College Student Nurse.
 - Black jeans or tight pants are not acceptable.
 - No denim will be worn unless specified by the clinical instructor.
 - All uniform tops must have the Cochise College Nursing emblem embroidered.
 - Lab coats and/or white sweaters may be worn only when not in the patient care area.
 - A white or black non-graphic $\frac{3}{4}$ sleeve undershirt may be worn under the uniform top.
 - The Cochise College name tag must be visible at all times.

Fingernails

- Natural fingernails must be clean, smooth, neatly trimmed, and of appropriate length for patient care.
- No artificial, acrylic, gel nails allowed. Clear polish only may be worn.

Hair

- Hair must be off the collar, clean, neat and worn in a professional manner that does not require constant attention. No bows, scarves, colored barrettes or flowers are allowed. Hair holders/devices should be approximately the same color as the student's hair. "Claw" and "banana" clips come loose and present a danger, and therefore are not acceptable. No "messy" bun style.

Scrub caps

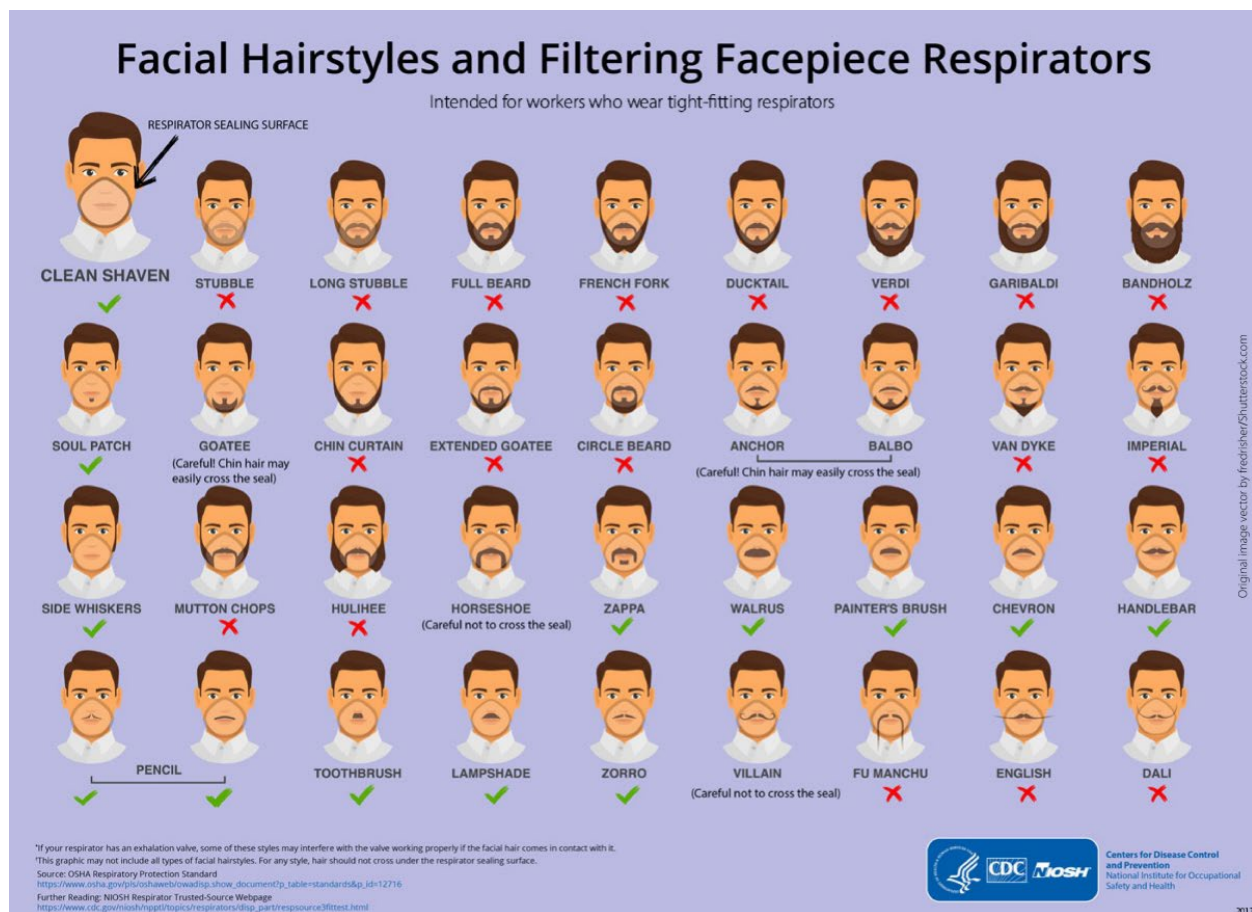

- To ensure patient safety and infection control, scrub caps head coverings worn in clinical must be white/black, cleaned daily and securely fastened behind the head.

Religious head coverings

- To ensure patient safety and infection control, religious head coverings worn in clinical must be white/black, cleaned daily and securely fastened behind the head.

Facial hair:

- Must be neatly trimmed.
- Note: certain facial hairstyles are not compatible with respirators (see below)

Jewelry

- Only stud/post earrings may be worn. Limited to one stud/ post per ear/nose. No posts may be worn on tongue, lips, eyebrows, etc. (visible body areas with the exception of the nose). Exception: students may retain a Daith Piercing if the piercing is for the treatment

of migraines and the student can provide documentation of a medical diagnosis of migraine from an Arizona licensed healthcare provider (MD, DO, NP, PA).

- Necklaces may NOT be worn.
- Rings are limited to one band-type ring or a wedding set.
 - NOTE: It is not advisable to wear rings in the clinical area because they may be a danger to clients, are frequently lost, and can harbor germs.
- A watch with a second-counting capacity is required.

Name badges

- Students are required to obtain Cochise College Nursing Student photo ID badges from the nursing department.
- ID photos will be taken the first week of NUR 122 orientation.
- NUR 123, NUR 124, NUR 232, NUR 233 and returning students must also request a photo ID badge prior to attending the first day of clinical.
- Replacement ID badges may also be obtained through the nursing office.

Personal hygiene

- Students should be especially attentive to personal cleanliness.
- Avoid the use of perfumes, scented after-shave lotions, etc. which may interfere with patient allergies.
- Tattoos must be covered at all times if found offensive (Faculty to make determination).

Shoes

- Shoes must be black or white, non-permeable material
- Shoes with laces: laces must be kept clean.
- No sandals, open toes, open heels, canvas or fabric shoes or clogs allowed.

Socks/stockings

- Students may wear white or neutral stockings, or plain white or black socks.

Supplies required

- When attending clinicals, the student must have:
 - Bandage scissors
 - A pen-light.
 - A black ball-point pen and notepaper
 - Hemostats
 - A watch with second-counting capacity.
 - Stethoscope

Review of Client Medical Records

A student must follow the healthcare agency's guidelines to review a client's medical record in an agency's Medical Records Department:

- The student will need to notify the Medical Records Department at the health care agency and make an appointment to review a client's record.
- The student may not duplicate or print any part of the patient's medical record. (This means any forms, pages, etc.)
- The student is not allowed to take any photographs of the clinical setting.
- The student must wear appropriate attire (no jeans, shorts, tank tops, etc.), or they may wear their uniform.
- The student must wear their Cochise College Nursing photo ID badge, obtainable through the nursing department.
- Students cannot access medical records of previously assigned patients to review their progress.

Impaired Student Policy

Impairment is defined as the inability to function safely and effectively.

- Students who have not had adequate rest are not able to function in a safe, effective manner in the clinical setting.
- Students of the Cochise College Nursing Programs must have at least eight hours of time off between working and reporting to their clinical assignments (including preceptorship). Any student not complying with this policy will be removed from the clinical setting and will be required to make up the hours. (See clinical make-up/fee policy.)

If a student is suspected by the clinical instructor of any condition and/or substance use that could impair or interfere with student or client safety they will be removed immediately from the client care areas, lecture, and lab areas, and the clinical coordinator/program director will be notified.

Suspected substance abuse

- During the clinical experience, if the clinical instructor, using their own professional discretion, suspects' substance abuse by a student, the instructor shall remove the suspected student immediately from the care of clients.

Refer to Cochise College Administrative Policy 5003 and Governing Board Procedure 614, Drug Free Workplace and “For Cause” Drug/Alcohol Screening Policy’ in the program manual.

Drug Screening Policy

All students admitted into the Cochise College Nursing Programs are required to submit a urine drug screening laboratory test on the date and time requested by the nursing department.

Only those students receiving negative drug screens will be permitted to maintain enrollment in the designated program.

Procedure:

- All admitted students are required to submit a urine drug screening as a condition of enrollment in the Registered Nurse Program.
- Students will be given a request form for drug screening by the nursing department prior to the start of clinical rotation to take to LabCorp. This form will include the student’s name, college name, program designation, program account number and the time frame required for the testing to occur.
- Students must complete the drug screening procedure at the time required by the Nursing Department.
 - Students failing to test during the date and time documented on the drug testing request form, do not meet the requirements for drug testing and will be withdrawn from all designated courses.
- Students must obtain an Authorization and Consent Form from the Nursing Department prior to testing.
 - Student is responsible for submitting a copy of the Cochise College Nursing Program Authorization and Consent Form.
- Students are responsible for payment of the screening (due at time of registration).
- A photo ID of the student is required at time the urine and/or blood sample is collected for testing.
- Student is responsible for confirming submitted results of drug screen to Cochise College Nursing Department.
- Students will not be allowed to use previous drug screens requested by any person or agency outside the Cochise College Registered Nurse Program.

Consequences for Positive Pre-Enrollment Drug Screen

- If the pre-enrollment drug screen is “positive” the student will not be permitted to maintain enrollment in the designated Cochise College Nursing Program unless cleared by Director of Nursing (prescribed medication).

- Students testing positive for drugs and who are licensed or certified by the state will be reported to the Arizona State Board of Nursing (AZBN).
- Students refusal to undergo screening within the time lines provided above may also be considered a failure to comply with the policy listed below
- Failure to comply with any aspect of this policy shall result in withdrawal from the nursing program.

For Cause Drug/Alcohol Screening Policy

Screening for drugs/alcohol will be done without advanced notice

This policy refers to the use/misuse of, or being under the influence of alcoholic beverages, illegal drugs or drugs which impair judgment. All students must be free of impairment while on duty in any health care facility, school, institution or other location as a representative of the Nursing/Allied Health Program or while attending classes or labs on any Cochise College campus.

Procedure

- When faculty member or agency personnel perceives the odor of alcohol or observes behaviors such as, but not limited to, slurred speech, unsteady gait, confusion, or belligerence and these behaviors cause the faculty member or agency personnel to suspect the student is impaired (see impaired student policy) the following steps will be taken pursuant to Cochise College Impaired Student Policy:
 - The instructor will remove the student immediately from the care of clients, assigned work area, clinic or the classroom/lab area, and notify the clinical coordinator, or program director.
 - The student will be immediately directed to the appropriate lab for drug/alcohol screening. (Student is responsible for Payment of screening):
 - Drug screen: within 12 hours of the incident if the student is referred
 - Alcohol screen: within 2 hours of the incident if the student is referred
 - The student shall be required to provide a photo ID to the lab at the time the urine and/or blood sample is taken for the drug or alcohol screen.
 - If the student admits to drug or alcohol use, they will still be required to undergo the drug/alcohol screening.

- A student shall not be allowed to return to the assigned work area, clinic, or the classroom/lab area, until the test results are documented as “negative” in a written report. The Medical Review Officer’s (MRO) report is final.
- If the results of the test(s) are negative for drugs, alcohol, illegal substances, or for non-prescribed legal substances, the student will meet with the Nursing Director/Clinical Coordinator to discuss the circumstances surrounding the impaired behavior.
- If the confirmed final report of a drug/alcohol screen is “positive” the student will be dismissed from the designated Nursing Program and the Arizona State Board of Nursing (AZBN) will be notified.
- If the student refuses to go for immediate screening they will be prohibited from attending clinical experiences, pending a full investigation. Refusal to undergo screening within the time lines provided in paragraph 1(b) above may also be considered a failure to comply with policy under paragraph 5 below.
- Failure to comply with any aspect of this policy shall result in withdrawal from the Nursing Program.

Medical Marijuana

Students may not use, possess, or cultivate marijuana for medical purposes. Students will be required to undergo drug testing according the Cochise College Nursing Program Drug Screening Policy. Any student testing positive for marijuana or derivatives will not be allowed continued enrollment in the Registered Nurse Program (Please refer to the Cochise College Administrative Policy: 5003.2).

Tobacco Free Policy

Health & Safety: Use of Tobacco Products

Cochise College Nursing Department is committed to providing a healthful environment for nursing students and the clients they care for in the clinical setting. A clinical setting is defined as any community site, place, health care facility in which a Cochise College nursing student is present to meet the requirements of a clinical rotation. It is important for Cochise College nursing students to project examples of healthy life styles.

- Smoking is defined as carrying or using any lighted tobacco product including cigars, cigarettes and pipes.
- Students may not smoke or use any smokeless tobacco during the hours of assigned clinical times and while representing the Cochise College Nursing program.
- Students must utilize only designated smoking areas while on Cochise College campuses (See Cochise College Administrative Policy 5008).

Fingerprint Clearance Card Policy

Required with application to Cochise College Registered Nurse Program

All students enrolled in the Cochise College Registered Nurse program are required to have a Fingerprint Clearance Card in order to take part in clinical experiences. A copy of the Fingerprint Clearance Card must be submitted with application to the Practical Nurse Certificate Program (verification of original will be obtained prior to enrollment). Fingerprint clearance is required to work and care for children, the elderly, and any vulnerable adult (Arizona State Statute and JCAHO requirements). If there is any positive criminal history, a fingerprint clearance card may be denied. The Fingerprint Clearance Card required for the practical nurse certificate program will not meet the requirements for certification or licensure through the Arizona State Board of Nursing. Certification and licensure will require additional fingerprinting.

There must be an allowance of up to 10 weeks for processing the fingerprint clearance card. Fingerprint clearance cards must be submitted to the Nursing office with the application to the practical nurse certificate program. Students may not enroll in or attend didactic/lab/clinical/or simulation without a current unexpired fingerprint card at any point within the program. The Fingerprint Clearance Card is valid for 6 years. The card cannot expire during any semester of enrollment.

Procedure

- From your internet connected computer go to www.azdps.gov
- Rest your cursor on the topic “Services” and in the menu that appears to the right, single click on “Fingerprint Clearance Card”
- The fingerprint clearance card webpage will be displayed, click on the topic “Apply for card” and then “Click here to apply.”
- You will be directed to the application website.
- Carefully follow the instruction to schedule an appointment. The first step is to complete the application by clicking on SCHEDULE AN APPOINTMENT (purple button or link on the website).

Social Networking Policy

American Nurses Association (ANA) Principles for Social Networking

Students are expected to follow the ANA’s Principles for Social Networking as listed below. Violations of these principles may result in termination from the Registered Nurse Program.

- Nurses must not transmit or place online individually identifiable patient information.
 - Nurses must observe ethically prescribed professional patient-nurse boundaries.
 - Nurses should understand that patients, colleagues, institutions, and employers may view postings.
 - Nurses should take advantage of privacy settings and seek to separate personal and professional information online.
 - Nurses should bring content that could harm a patient's privacy, rights, or welfare to the attention of appropriate authorities.
 - Nurses should participate in developing institutional policies governing online conduct.
-
- Six Tips to Avoid Problems
-
- Remember that standards of professionalism are the same online as in any other circumstance.
 - Do not share or post information or photos gained through the nurse-patient relationship.
 - 3. Maintain professional boundaries in the use of electronic media. Online contact with patient blurs this boundary.
 - Do not make disparaging remarks about patients, employees or co-workers, even if they are not identified.
 - Do not take photos or videos of patients on personal devices, including cell phones.
 - Do not take or post any inappropriate/unprofessional photos or videos.
 - Promptly report a breach of confidentiality or privacy.

Students must adhere to Cochise College Administrative Policy 1018: Social Media

Violation of any of the Standards of Professional conduct, Cochise College Nursing Code of Academic/Clinical Integrity, or ANA's Principles of Social Networking will result in a required meeting with the student and Director of Nursing within five business days and may result in termination from the program with no possibility of return/reapplication.

ADMISSION FORMS & CONTRACTS

All candidates, who are accepted to the Cochise College Registered Nurse Program, are required to sign contractual forms.

Admission Forms & Contracts

All candidates, who are accepted to the Cochise College Registered Nurse Program, are required to sign contractual forms.

Sign and return the following at the beginning of each Semester:

1. Student Contract
2. Statement of Understanding
3. Student Policies Acknowledgement
4. Confidentiality Agreement
5. The Code of Academic and Clinical Integrity

These disclosure documents are kept in the student's official program file and are a part of the student record.

Sign and return these forms as Needed:

1. Changes in Physical or Mental Condition: Returning Student
2. Report of Alternate Clinical/Lab/Remediation Experience
3. Student Travel Permission/Release Waiver

Student Contract

2023-2024

Students in the Cochise College Nursing Programs participate in clinical experiences at a wide variety of agencies throughout the County in the course of their education. In exchange for providing this educational experience, there are certain expectations of the students. This contract is intended to detail certain expectations.

- ☐ The student consents to have name, immunization and communicable disease status, and reasonable information concerning verification of physical fitness released to the agencies upon demand.
- ☐ The student must meet the requirements for a specific physical, with no limitations, prior to entering the Cochise College Registered Nurse Program. Failure to provide this physical will result in failure to successfully complete the program. Changes in physical status, including pregnancy, need to be reported to the clinical coordinator promptly. The nursing department has final decision for continuation in the program.
- ☐ All written materials containing patient and/or agency information, including those intended for publication or use outside of the school setting must be prepared in such a way as to protect the patient and/or agency from identification or other sensitive issues. No photo copies of any patient records or information is allowed.
- ☐ All students hereby agree to abide by the rules and regulations both of the College and of the agency where clinical is occurring.
- ☐ In the course of learning nursing skills students may practice non-invasive skills on each other. **No invasive skills** may be practiced by any student or instructor. If a student objects to practice sessions involving other students, she/he may discuss the situation with the Learning Lab Coordinator.

Confidentiality Agreement

2023-2024

- ☐ I understand that Cochise College contracts with health care agencies that practice a policy of strict confidentiality in disclosing information regarding its patients/providers/staff. In performing my duties as a student, I may be privy to confidential information. I may have access to such confidential information through patient records, personnel records, hospital computer systems, or other information sources in the facility.
- ☐ I understand that I am required to comply with the Protected Health Information (PHI) standards amended by the Health Insurance Portability and Accountability Act (HIPAA) at <https://www.hhs.gov/hipaa/index.html>
- ☐ I also understand that I may be privy to confidential information in regards to fellow students, faculty, and staff of Cochise College and prospective employers; all such information will be kept confidential.
- ☐ I recognize and acknowledge the above stated policy on confidentiality and am signifying my commitment to that end (to include the period of time after my student status terminates) by affixing my signature to this document.

Changes in Physical or Mental Condition

(Returning Students)

2023-2024

Students in the Cochise College Registered Nurse Program participate in clinical experiences at a wide variety of agencies throughout the County in the course of their education. Students are required to have a physical completed by their primary physician. Students should understand there are health risks involved in the pursuit of any of the health career programs (see Statement of Understanding).

In order to reduce these health risks, Cochise College Nursing Department requires all students to submit a statement of continued physical and mental ability for the Nursing Program.

I, the undersigned, have had no change in my physical or mental abilities to continue in the Cochise College Nurse Program. I understand if there are any changes that impedes my ability to safely provide care to patients, I will notify the Director of Nursing/ Clinical Coordinator or Accessibility office.

I understand that all persons making field trips or excursions are deemed to have waived all claims whatsoever against the Cochise County Community College District and their agents, officers, and employees for any injury, accident, illness, or death occurring during or by reason of the field trip or excursion; except when the District fails to fulfill its legal obligation to exercise reasonable care in supervising students while they are engaged in District sponsored activities or using District provided transportation. Students are responsible under College policy 4006 (Social Standards) for their personal conduct during all trips and must adhere to all instructions and directives given by an Instructor/Advisor/ Chaperone. Violations of the Social Standards policy can result in a College administrative hearing.
